AL WARMING**

SCAN ME

This is all wrong. I shouldn't be up here. I should be back in school on the other side of the ocean. Yet you all come to us young people for hope? How dare you! You have stolen my dreams and my childhood with your empty words. And yet I'm one of the lucky ones. People are suffering. People are dying. Entire ecosystems are collapsing. We are in the beginning of a mass extinction. And all you can talk about is money and fairytales of eternal economic growth.

Climate protests are a form of activism that aims to raise awareness about climate change and push for action to address its causes and impacts. These protests can take many forms, from peaceful marches and rallies to civil disobedience and direct action.

People participate in climate protests to demand action from governments, corporations, and other institutions to reduce greenhouse gas emissions, transition to renewable

“**ACT AS IF YOUR HOUSE IS ON FIRE, BECAUSE IT IS.**”

Greta Thunberg has frequently mentioned global warming and its impacts in her speeches and activism. She often emphasizes the urgent need for action to address the climate crisis, including reducing greenhouse gas emissions and limiting global warming to well below 2 degrees Celsius above pre-industrial levels, as outlined in the Paris Agreement.

Climate protests are a form of activism that aims to raise awareness about climate change and push for action to address its causes and impacts. These protests can take many forms, from peaceful marches and rallies to civil disobedience and direct action.

Join the Movement to Save Green

“ Preserving the green around us is not just an environmental effort; it’s a crucial step in safeguarding the very essence of humanity and ensuring a sustainable future for generations to come ”

The article begins by laying the groundwork, defining key concepts and outlining the urgent need for action in the face of climate change and environmental degradation. It then dives into practical tips and strategies for reducing carbon footprint, conserving resources, and minimizing waste in various aspects of life, including home, transportation, food, and fashion.

“ Green revolution will help to survive humanity and society ”

by laying the groundwork, defining key concepts and outlining the urgent need for action in the face of climate change and environmental degradation. It then dives into practical tips and strategies for reducing carbon footprint, conserving resources, and minimizing waste in various aspects of life, including home, transportation, food, and fashion.

Green Save also explores the role of technology in sustainability, highlighting innovations in renewable energy, waste management, and transportation that are helping to reshape the way we live

Green New Deal

The Green New Deal is a proposed set of United States economic stimulus programs aimed at addressing climate change and economic inequality. The name refers to the New Deal, a set of social and economic reforms and public works projects undertaken by President Franklin D. Roosevelt in response to the Great Depression. The Green New Deal combines ideas from the modern environmental movement with Roosevelt's econom-

Leaders behind Green New Deal

Roosevelt in 1933-1935 in response to the Great Depression in the United States. The Green New Deal combines Roosevelt's economic approach with modern ideas such as renewable energy and resource ef-

The 2019 United States congressional resolution Recognizing the duty of the Federal Government to create a Green New Deal introduced by Alexandria Ocasio-Cortez and Ed Markey advocated a "just transition",

Edward J. Markey, a United States Senator from Massachusetts. He has been a proponent of the Green New Deal and has worked on various environmental and climate change initiatives throughout his career.

Ensuring Economic Security

This involves providing job guarantees, healthcare, and other social benefits to ensure economic security for all Americans.

Creating Green Jobs

The Green New Deal aims to create millions of new jobs in industries such as renewable energy, construction, and manufacturing.

Transitioning to 100% Renewable

Green New Deal. This involves shifting from fossil fuels, such as coal, oil, and natural gas, to renewable sources of energy, such as solar, wind, and hydroelectric

Building Infrastructure

This includes upgrading buildings and transportation systems to be more energy-efficient.
